Hiring Manager

Zerodha
Bengaluru, Karnataka, India

With reference to the opening you've advertised at the company's career section, for the DevOps Engineer position, I am attaching my resume for your review.

Packing an year long of experience working as a DevOps Engineer, I also am proficient in the following skills by building several practical projects and creating highly scalable, production-ready pipelines.

- Experience working with highly distributed infrastructure on hybrid cloud platforms (GCP, AWS, On-Prem).
- Experience building solutions for On-Premise multi-cluster application deployments setup using Rancher, further expanding to Cluster monitoring, health-checks, alerts, managing updates/upgrades and finally disaster recovery with Velero.
- Deep familiarity with embedded DevOps tools and best practices, like:
 - Docker, Docker-swarm & Kubernetes for container orchestration.
 - Ansible & Jinja templates for writing Infrastructure as Code (IaC) to automate setting up of tightly-secured and ssh hardened systems/servers.
 - Helm/Helm-charts for packaging microservice architecture (or multi-cluster) applications.
 - Prometheus, Grafana & Loki for metrics monitoring, logging & configuring alerts.
 - CircleCI and Github Actions for writing CI/CD pipelines.
 - Replicated/KOTS for end-to-end product release & license management.

I believe I am a good fit for the position and am ready to meet the challenges of the position, bringing value to your organization.

My previous work experience at a DataOps organisation, has resulted in a high level of expertise in writing & maintaining infrastructure for industrial use. In one instance, I've worked on optimizing the cost of running an entire data cataloging & discovery stack by 40%, bringing in a lite version of the product.

I am available for an interview at your convenience and would welcome the opportunity to discuss my experience and qualifications further as they relate to your needs.

My email address is priyankasaggu11929@gmail.com and my phone number is +91 8168904724.

I look forward to hearing from you soon.

Sincerely,

Priyanka Saggu
